National Interoperability Field Operations Guide

U.S. Department of Homeland Security
Office of Emergency Communications
Version 1.6

Homeland Security

May 2015

First printing – May 2015

INTRODUCTION

The National Interoperability Field Operations Guide (NIFOG) is a technical reference for emergency communications planning and for radio technicians responsible for radios that will be used in disaster response. The NIFOG includes rules and regulations for use of nationwide and other interoperability channels, tables of frequencies and standard channel names, and other reference material, formatted as a pocket-sized guide for radio technicians to carry with them.

If you are not familiar with interoperability and mutual aid communications, start with the "How to Use the National Interoperability Field Operations Guide" section.

We encourage you to program as many of these interoperability channels in your radios as possible, as permitted by the applicable regulations. Even if geographic restrictions on some channels preclude their use in your home area, you may have the opportunity to help in a distant location where the restrictions do not apply. Maximize your flexibility.

To download or request copies of the NIFOG, please visit

http://publicsafetytools.info

Your comments are welcome at NIFOG@HQ.DHS.GOV

Thank you.

Ronald T. Hewitt, Director, Office of Emergency Communications
Ross Merlin, NIFOG Author, National Coordinating Center for Communications

U.S. Department of Homeland Security

TABLE OF CONTENTS

USING THE NATIONAL INTEROPERABILITY FIELD OPERATIONS GUIDE

What is the "National Interoperability Field Operations Guide"?

The "National Interoperability Field Operations Guide" (NIFOG) is a pocket-sized listing of land mobile radio (LMR) frequencies that are often used in disasters or other incidents where radio interoperability is required, and other information useful to emergency communicators.

Terms used in this document:

- FCC – Federal Communications Commission
- FCC Rules – contained in Title 47, Code of Federal Regulations (47CFR)
- Federal – used herein to differentiate between radio stations of the United States Government and those of any State, tribal, local, or regional governmental authority. "Federal Frequencies" refer to frequencies (channels) available for assignment to U.S. Government Agencies. Although the FCC is a Federal Government agency, the frequencies it administers are not "federal frequencies" - they are administered for state/tribal/local governments, commercial entities, and individuals.
- NCC – (1) the Public Safety National Coordination Committee, a Federal Advisory Committee formed by the FCC to advise it on interoperability; (2) National Coordinating Center for Telecommunications.

- NPSTC – the National Public Safety Telecommunications Council is a federation of organizations whose mission is to improve public safety communications and interoperability through collaborative leadership. After the charter for the NCC expired, NPSTC continued NCC's efforts to establish a common channel nomenclature. NPSTC channel IDs used in the NIFOG are based on the "Standard Channel Nomenclature for the Public Safety Interoperability Channels", APCO ANS 1.104.1-2010, approved June 9, 2010 by the American National Standards Institute (ANSI) - see http://www.npstc.org/documents/APCO-NPSTC-ANS1-104-1web.pdf
- NTIA – National Telecommunications and Information Administration
- NTIA Manual – The NTIA "Manual of Regulations and Procedures for Federal Radio Frequency Management" http://www.ntia.doc.gov/osmhome/redbook/redbook.html
- Radio frequencies are in MegaHertz (MHz) unless otherwise noted.
- CTCSS tone frequencies are in Hertz (Hz) or two-character Motorola codes.
- Emissions on frequencies above 138 MHz are narrowband analog FM, unless otherwise noted.

How is the NIFOG used?

The NIFOG may be used by radio technicians when programming channels in radios. We recommend having these channels programmed in radios at all times, as permitted by the applicable regulations, rather than waiting until a disaster is imminent or occurring to do the programming.

The NIFOG also is a useful tool for emergency communications planners, providing them with information on the interoperability channels most likely to be in the radios of responders from another discipline or jurisdiction.

Don't I need a license for these channels before programming them into radios?
If you are licensed under Part 90 of the FCC rules, you may program frequencies (other than maritime or aviation) that you are not licensed to use IF "the communications involved relate directly to the imminent safety-of-life or property" or "with U.S. Government stations ... in connection with mutual activities" (see FCC rules 90.427 and 90.417, and Public Notice DA 01-1621). See "Conditions for Use of Federal Interoperability Channels", page 19 - page 21. There are no restrictions on programming frequencies into U.S. Government radios.

However, note that 90.403(g) requires that "[f]or transmissions concerning the imminent safety-of-life or property, the transmissions shall be suspended as soon as the emergency is terminated." Also, the *safety of life* provision of 90.417(a) makes it clear that the exception applies only when the communications involved "relate directly" to the "imminent" safety of life or property. Because one overriding policy concern of the FCC is the prevention of harmful interference, any exceptions to the general prohibition on using non-licensed frequencies are limited to responding to an imminent threat to safety-of-life or property. See also 90.407 dealing with communications during an emergency which disrupts normal communications facilities and §90.411 dealing with civil defense communications.

Programming of maritime channels must be performed only by a person holding a first or second class radiotelegraph operator's certificate, a radiotelegraph operator license, or a general radiotelephone operator's license - 47 CFR 80.203(b)(3). See also 80.203(b)(4) and §80.169(a).

A general radiotelephone operator must directly supervise and be responsible for all transmitter adjustments or tests during installation, servicing or maintenance of an aeronautical radio station - see §87.73.

How can I use these frequencies if I don't have a license for them?

There are seven ways you can legally use these radio frequencies:

1. You or your employer may already have a Federal Communications Commission (FCC) license or a National Telecommunications and Information Administration (NTIA) authorization for some of the interoperability and mutual aid frequencies.
2. **For FCC licensees**, the non-Federal National Interoperability Channels VCALL10-VTAC14 and VTAC33-38, UCALL40-UTAC43D, the 800 MHz interoperability channels, and 8CALL90-8TAC94D are covered by a "blanket authorization" from the FCC - "Public safety licensees ... can operate mobile units on these interoperability channels without an individual license." See FCC 00-348, paragraph 90 (released October 10, 2000) for VHF and UHF; see FCC rules 90.421(a)(3) and 90.525(a) for 700 MHz; see FCC 87-112, paragraph 34 (released December 18, 1987), for 800 MHz. When North of Line A or East of Line C the blanket authorization in paragraph 90 of FCC 00-348 applies only to mobile (including hand-held) stations operating with an effective radiated power (ERP) of 3 watts or less. At higher power levels, frequency coordination is required. Line A and C are defined in 47CFR90.7. You can check a location for Line A and Line C restrictions at http://wireless.fcc.gov/uls/index.htm?job=line_a_c
3. You may operate on frequencies authorized to another licensee when that licensee designates you as a unit of their system, in accordance with FCC rule 90.421; or as an authorized user of a shared radio system pursuant to a written agreement as described in FCC rule 90.179.
4. In extraordinary circumstances, the FCC may issue a "Special Temporary Authority" (STA) for such use in a particular geographic area.

5. In extraordinary circumstances, the NTIA may issue a "Temporary Assignment" for such use in a particular area.
6. **If you are an FCC Part 90 licensee, you may operate a mobile station on the Federal Interoperability Channels only when authorized by the FCC (by license or STA) and only for interoperability with Federal radio stations authorized by the NTIA to use those channels. You may not use these channels for interoperability with other State, tribal, regional, or local radio stations – these are not a substitute for your regular mutual aid channels. See FCC Public Notice DA 01-1621, released July 13, 2001.**
7. When necessary for the IMMEDIATE protection of life or property, **FCC Part 90 licensees** may use prudent measures beyond the specifics of their license. See FCC rule 90.407, "Emergency communications". **U.S. Government stations** are authorized by NTIA rule 7.3.6 to operate on any Part 90 frequency with the permission of the FCC licensee when such use is necessary for communications directly related to the emergency at hand.

FCC Rules for Interoperability

90.407 Emergency communications.

The licensee of any station authorized under this part may, during a period of emergency in which the normal communication facilities are disrupted as a result of hurricane, flood, earthquake or similar disaster, utilize such station for emergency communications in a manner other than that specified in the station authorization or in the rules and regulations governing the operation of such stations. The Commission may at any time order the discontinuance of such special use of the authorized facilities. [49 FR 36376, Sept. 17, 1984]

90.411 Civil defense communications.

The licensee of any station authorized under this part may, on a voluntary basis, transmit communications necessary for the implementation of civil defense activities assigned such station by local civil defense authorities during an actual or simulated emergency, including drills and tests. The Commission may at any time order the discontinuance of such special use of the authorized facilities.
[49 FR 36376, Sept. 17, 1984]

(NTIA Rules for Interoperability – continued)

90.417 Interstation communication.

(a) Any station licensed under this part may communicate with any other station without restriction as to type, service, or licensee when the communications involved relate directly to the imminent safety-of-life or property.

(b) Any station licensed under this part may communicate with any other station licensed under this part, with U.S. Government stations, and with foreign stations, in connection with mutual activities, provided that where the communication involves foreign stations prior approval of the Commission must be obtained, and such communication must be permitted by the government that authorizes the foreign station. ...

90.421 Operation of mobile station units not under the control of the licensee.

Mobile stations, as defined in § 90.7, include vehicular-mounted and handheld units. Such units may be operated by persons other than the licensee ...

90.423 Operation on board aircraft.

Allowed on most Public Safety frequencies up to 1 mile altitude, up to 10 watts, secondary to land-based systems; for air-to-mobile, air-to-base, air-to-air, and air-to-ship communications.

90.427 Precautions against unauthorized operation.

(a) ...

(b) Except for frequencies used in accordance with § 90.417, no person shall program into a transmitter frequencies for which the licensee using the transmitter is not authorized.

NTIA Rules for Interoperability

7.3.4 Emergency Communications for which an Immediate Danger Exists to Human Life or Property

1. In situations where immediate danger exists to human life or property, an agency may operate temporarily on any regularly assigned frequency in a manner other than that specified in the terms of an existing assignment. Emergency operations under such situations should continue only as long as necessary to ensure that the danger to human life or property no longer exists. Emergency operations under these circumstances shall be reevaluated on a regular basis until such time as normal/routine operations can be reestablished.
2. Interoperable communications for disaster/emergency response involving Federal, State, local, and tribal entities shall be in conformance with Section 4.3.16 of this Manual. Additional information regarding interoperable communications can also be found in the National Interoperability Field Operations Guide (NIFOG) ... promulgated by the Department of Homeland Security.

7.3.6 Emergency Use of Non-Federal Frequencies

In emergency situations, a Federal radio station may utilize any frequency authorized to a non-Federal radio station, under Part 90 of the FCC Rules and Regulations, when such use is necessary for communications with non-Federal stations and is directly related to the emergency at hand. Such use is subject to the following conditions:

a. The non-Federal licensee has given verbal or written concurrence.

b. Operations are conducted in accordance with the FCC Rules and Regulations.

(NTIA Rules for Interoperability – continued)

c. Use is restricted to the service area and station authorization of the licensee.

d. All operations are under the direct control of the licensee and shall be immediately terminated when directed by the licensee.

e. Operations do not exceed 60 days.

f. A written report of each such use shall be provided, through the agency's FAS [Frequency Assignment Subcommittee, of NTIA's IRAC (Interdepartment Radio Advisory Committee)] representative, to the FCC as soon as practicable.

7.5.2 Frequencies Authorized by the FCC for Ship Stations

Frequencies authorized by the Federal Communications Commission for ship stations may be used by Federal mobile stations to communicate with non-Federal stations in the maritime mobile service.

7.5.3 Frequencies for the Safety of Life and Property

... (5) The frequency 40.5 MHz is designated as the military joint common frequency. Use of this channel is limited to communications necessary to establish contact when other channel information is not available and for emergency communications. This frequency also may be used for search and rescue communications.

(6) The provisions of this Manual do not prevent mobile stations, or mobile earth stations, in distress from using any frequency at its disposal to attract attention, make known its position, and obtain help. (See ITU Radio Regulation Ap. 13 Part A1, § 6,1.)

(NTIA Rules for Interoperability – continued)

7.5.4 Frequencies for Coordinating Search and Rescue Operations

... (2) The frequency 123.1 MHz, using class A3E emission, may be used by stations of the aeronautical mobile service and by other mobile and land stations engaged in coordinated search and rescue operations.

(3) The frequency 156.3 MHz [VHF Marine channel 6] may be used for communications between ship stations and aircraft stations, using G3E emission, engaged in coordinated search and rescue (SAR) operations. When control of the scene of a SAR incident is under a Coast Guard coast station, 156.3 MHz may be used by ship stations to communicate with that coast station.

Does the NIFOG authorize me to use certain frequencies?

NO. The NIFOG does not grant authority to operate on any radio frequencies. Such authority can come only from the FCC or the NTIA.

Is the NIFOG the national emergency communications plan?

The NIFOG is the national guide for possible use in a situation where no other radio interoperability arrangement was promulgated by local authorities, or where emergency responders are unaware of such an arrangement. The NIFOG does NOT supersede any Federal, State, tribal, local, or regional emergency communications plan. If you are dispatched to a disaster or incident scene and have no other information on how to make contact with other emergency responders, the NIFOG provides useful suggestions for which frequencies to use to attempt initial contact.

Are the interoperability channels discussed in the NIFOG available nationwide?

No. Not all frequencies are available nationwide for use as described in the NIFOG. In particular, the "Non-Federal VHF Inland Interoperability Channels" may be used only in certain inland parts of the country, away from coastal areas and major waterways (see the map titled Counties Where VTAC17/ VTAC17D May Be Used on page 27 for further details). Other channels in this plan may not be usable due to the potential for adjacent channel interference in some areas, or due to authorized on-channel uses that are different than the common uses described in the NIFOG. Use of the VCALL/ VTAC and UCALL/UTAC channels by mobiles (and hand-helds) North of Line A / East of Line C is limited to 3 watts ERP; higher power requires frequency coordination with Canada.

For a detailed list of which counties are in which VHF Public Coast (VPC) area, see:

http://www.fcc.gov/oet/info/maps/areas/data/2000/FCCCNTY2K.txt and
http://www.fcc.gov/oet/info/maps/areas/data/2000/README_FCCCNTY2K.txt

FCC online area cross-reference search: http://www.fcc.gov/fcc-bin/cesearch.pl

Who do I contact to use interoperability channels?

These channels can be used where licensed or authorized by FCC or NTIA, including authorization by a STA.

Plans for how these channels will be used may be in the Statewide Communications Interoperability Plan (SCIP) or the Tactical Interoperable Communications Plan (TICP) for the area of operations. Information on using 700 and 800 MHz interoperability channels may be found in the plans of your 700 MHz Regional Planning Committee or 800 MHz Regional Planning Committee. Contact your Statewide Interoperability Coordinator (SWIC) for these plans, and for additional guidance on use of these channels.

The COML (Communications Unit Leader) acts as or delegates the role of frequency manager; assigning specific uses to available radio channels and coordinating with dispatchers, the FCC, and NTIA for authorization to use additional channels as needed.

If access to the COML has not been pre-arranged or is not working as planned, try the calling channels specified in the NIFOG at or near the command post, incident scene, or staging area.

Directory of 700 MHz Regional Planning Committees:

http://publicsafety.fcc.gov/pshs/public-safety-spectrum/700-MHz/rpc-map.htm

Directory of 800 MHz Regional Planning Committees:

http://publicsafety.fcc.gov/pshs/public-safety-spectrum/800-MHz/regional-planning.htm

How do I request a Special Temporary Authorization (STA)?

FCC licensees request a Special Temporary Authorization (STA) from the FCC:

During Normal FCC Business Hours (Monday through Friday, 8:00am - 4:30pm EST/EDT)

Tracy Simmons - STA Licensing (Part 90--Land Mobile and Public Safety), Public Safety & Homeland Security Bureau - phone: 717-338-2657 email: Tracy.Simmons@fcc.gov
or file electronically: FCC Form 601 - ULS http://wireless.fcc.gov/uls/ then click on Online Filing "LOG IN"

Outside of Normal FCC Business Hours (4:30pm - 8am EST/EDT, weekends, and holidays)
FCC Operations Center (FCCOC)
phone: 202-418-1122 email: FCCOPS@fcc.gov

First Responders and Public Safety Entities with general STA inquiries
Zenji Nakazawa, Deputy Division Chief, Public Safety & Homeland Security Bureau

phone: 202-418-7949 email: Zenji.Nakazawa@fcc.gov

or

FCC Operations Center (FCCOC) phone: 202-418-1122 email: FCCOPS@fcc.gov

U.S. Government radio stations request temporary assignment or STAs via their agency representative to the Frequency Assignment Subcommittee (FAS) of the Interdepartment Radio Advisory Committee (IRAC). See NTIA Manual section 8.3.32.

The telephone number for the NTIA Frequency Assignment Branch is 202-482-1132.

[See the previous page for requesting STAs when a Joint Field Office is operational for an incident.]

Does the NIFOG specify exactly how to program channels?

No. There is no one-size-fits-all solution due to differing radio designs. The NIFOG uses the ANSI "Standard Channel Nomenclature for the Public Safety Interoperability Channels" for channel names - see "NPSTC" on page 2.

For some channels, the standard nomenclature specifies a "direct" ("talk-around") channel for repeaters which takes an additional memory slot. Some radios have a switch for talk-around on a repeater channel, and using this feature saves memory slots. Similarly, some radios may have a switch or button to enable or disable receive CTCSS; if not, another channel may be programmed so both modes are available.

Consider programming additional VHF Marine channels as possible interoperability channels (for use when properly authorized), based on local or regional use. In particular, channels used by drawbridge tenders may be appropriate; see http://wireless.fcc.gov/marine/vhfchanl.pdf for authorized channel uses and http://www.navcen.uscg.gov/?pageName=mtVhf for frequencies.

Recommended modes for using Federal Interoperability Channels: use analog for all Incident Response channels (CTCSS 167.9 Hz) and Law Enforcement channels LE A, LE 1, LE B, LE 10, and LE 16 (CTCSS 167.9 Hz); use P25 digital for the remaining LE channels, NAC $68F (167910). CTCSS should always be transmitted on the analog channels, but carrier squelch (CSQ, no CTCSS) should be used on receive. Consider allowing the user to enable or disable CTCSS on receive by a switch or button; otherwise use CSQ on receive.

How do emergency responders use the calling channels?
As you approach an incident scene or staging area, you might establish contact on a dispatch or working channel. If you can't make contact, or if no channel was designated for this purpose, attempt to make contact on one of the designated interoperability calling channels. If it is a repeater channel and you get no response, try the "direct" or "talk-around" mode if your radio has that capability. In some cases, the talk-around channel exists as a distinct channel on the radio. For example, the VHF Incident Response Federal Interoperability Channel is known as "NC 1". The talk-around for this repeater channel is known as "IR 5".

The non-Federal national interoperability calling channels are VCALL10, UCALL40, 7 CALL50, 7 CA LL70, and 8 CALL90; the Federal IR and LE calling channels are "NC 1" (direct: "IR 5"), "NC 2" (direct: "IR 15"), "LE A", and "LE B". You may be able to learn what you need without transmitting, by just listening to radio traffic on one of these channels.

If a "travel channel" is needed (e.g. for communications between vehicles in a convoy), 7 CALL70D is recommended if that will not interfere with its use as a calling channel.

May the Nationwide Interoperability Channels be used for tests and exercises?
FCC rule 90.417 authorizes communications "in connection with mutual activities", which includes tests and exercises. FCC rule 90.411 authorizes communications for civil defense (emergency management) activities during an actual or simulated emergency, including drills and tests.

How do Search and Rescue personnel on land, on watercraft, and on aircraft coordinate by radio?

Certain VHF Marine channels are designated in this plan for Search and Rescue (SAR) interoperability. Searchers on land, in boats, and in aircraft need to be able to communicate with each other to coordinate rescues. There is no VHF channel authorized and readily available to all three communities. Some aircraft involved in SAR have VHF Marine radios, as do most boaters; but the VHF radios that many ground SAR groups use are not approved for use on maritime frequencies, and they may be incapable of being programmed to operate in the wideband FM mode used on maritime frequencies. VHF marine radios may not be used on land unless they are licensed as marine utility stations, public or private coast stations, or maritime support stations. VHF Marine channels may not be used for terrestrial search and rescue operations – they are in this plan due to the likelihood of boats being involved in SAR in coastal areas.

Frequency 155.16 MHz is licensed to many SAR organizations. It is the *de facto* SAR interoperability channel, and has been given the standardized channel name of VSAR16. We encourage public safety entities to obtain licenses for this frequency to facilitate interoperability.

State or local government vehicles used to tow vessels involved in search and rescue operations are authorized to operate on maritime mobile frequencies as associated ship units. Such operations may use Distress, Safety and Calling, Intership Safety, Liaison, U.S. Coast Guard, or Maritime Control VHF intership frequencies; and may have a transmitter power of 25 watts. [FCC rule 80.115] Federal vehicles have similar authorization. [NTIA Manual 8.2.29(c)(6)]

Should Fire/EMS radios have the Law Enforcement interoperability channels programmed, and vice versa?

Yes. Radios for public safety personnel should have as many of these interoperability channels programmed as possible, as permitted by the applicable regulations. Interoperability may require crossing jurisdictional and functional lines. On the Federal interoperability channels, "Incident Response" (IR) means everybody – Fire, Rescue, EMS, Public Works, Law Enforcement, etc. The "Law Enforcement" (LE) channels will be used "primarily" for Law Enforcement activities, but could be designated for other incident support if that would not hamper Law Enforcement activities, and if assigned by the agency in control of the incident.

How can I get answers to questions about the "National Interoperability Field Operations Guide", or how can I offer suggestions to improve it?

Please send your questions or comments to the U.S. Department of Homeland Security, Office of Emergency Communications, at NIFOG@HQ.DHS.GOV and include your name, agency or organization affiliation, and your e-mail address.

How do I get copies of the NIFOG?

The latest version of the NIFOG can be downloaded or ordered from http://publicsafetytools.info

Regulations and Guidelines for National Interoperability

1. The FCC and NTIA rules allow for some flexibility in frequency use by personnel directly involved in a situation where there is imminent danger to human life or property. This does NOT mean "In an emergency, anything goes."
2. For communications not covered by #1, your use of a radio frequency must be authorized by:
   a. Your (or your agency's) FCC license or NTIA authorization
   b. "License by rule" – a provision in FCC rules that authorizes use of a radio frequency under specified conditions without a specific license or authorization issued to the user
   c. A "Special Temporary Authorization" provided by FCC or NTIA
3. Digital P25 operations on non-Federal interoperability channels should transmit the default Network Access Code (NAC) $293 ($659_{10}$), and receive with NAC $F7E ($3966_{10}$) (accept any incoming NAC). Specify talkgroup $FFFF ($65535_{10}$), which includes everyone.
4. Default modes for using Federal Interoperability Channels: use analog for all Incident Response channels and Law Enforcement channels LE A, LE 1, LE B, LE 10, and LE 16; use P25 Digital for the remaining LE channels, NAC $68F ($1679_{10}$).

Conditions for Use of Federal Interoperability Channels

1. The "VHF Incident Response (IR) Federal Interoperability Channel Plan", the "UHF Incident Response (IR) Federal Interoperability Channel Plan", the "VHF Law Enforcement (LE) Federal Interoperability Channel Plan", and the "UHF Law Enforcement (LE) Federal Interoperability Channel Plan" show frequencies available for use by all Federal agencies to satisfy law enforcement and public safety incident response interoperability requirements. These frequencies will be referred to hereinafter as "Federal Interoperability Channels".
2. The Federal Interoperability Channels are available for use among Federal agencies and between Federal agencies and non-federal entities with which Federal agencies have a requirement to operate.
3. The channels are available to non-federal entities to enable joint Federal/non-federal operations for law enforcement and incident response, subject to the condition that harmful interference will not be caused to Federal stations. These channels are restricted to interoperability communications and are not authorized for routine or administrative uses.
4. Extended operations and congestion may lead to frequency conflicts. Coordination with NTIA is required to resolve these conflicts.
5. Only narrowband emissions are to be used on the Federal Interoperability Channels.

6. Equipment used (transmitters and receivers) must meet the standards established in Section 5.3.5.2 of the NTIA Manual:
   a. TIA/EIA 603-B for narrowband analog;
   b. TIA TSB 102.CAAB-A for narrowband digital
7. A complete listing of conditions for use by Federal users can be found in Section 4.3.16 of the NTIA Manual.
8. Use of these frequencies within 75 miles of the Canadian border and 5 miles of the Mexican border require special coordination and in some cases will not be available for use.

Law Enforcement Plans

1. Frequencies 167.0875 MHz and 414.0375 MHz are designated as National Calling Channels for initial contact and will be identified in the radio as indicated in the Law Enforcement Federal Interoperability Channel Plans.
2. Initial contact communications will be established using narrowband analog FM emission (11K25F3E).
3. The interoperability channels will be identified in mobile and portable radios as indicated in the Law Enforcement Federal Interoperability Channel Plans with Continuous Tone-Controlled Squelch Systems (CTCSS) frequency 167.9 Hz and/or Network Access Code (NAC) $68F ($1679_{10}$).

Incident Response Plans

1. Frequencies 169.5375 MHz (paired with 164.7125 MHz) and 410.2375 MHz (paired with 419.2375 MHz) are designated as the calling channels for initial contact and will be identified in the radio as indicated in the Incident Response Federal Interoperability Channel Plans.
2. Initial contact will be established using narrowband analog FM emission (11K25F3E).
3. To ensure access by stations from outside the normal area of operation, Continuous Tone-Controlled Squelch Systems (CTCSS) will not be used on the calling channels.
4. The interoperability channels will be identified in mobile and portable radios as indicated in the "VHF Incident Response (IR) Federal Interoperability Channel Plan" and the "UHF Incident Response (IR) Federal Interoperability Channel Plan".

Recommendations for Programming the Federal Interoperability Channels

1. If there is enough room in your radio, program all channels as analog and again as digital channels. If not, program as follows:
   a. Incident Response channels – all analog.
   b. Law Enforcement channels – program all as P25 digital with NAC $68F (167910) except LE A, LE 1, LE B, LE10, and LE 16 which are to be programmed analog with Tx CTCSS 167.9 Hz (6Z) and no Rx CTCSS (carrier squelch, CSQ)
2. If your radio has a user-selectable option to enable/disable CTCSS on receive, you may choose to configure this option so that the user can enable the same CTCSS tone used on transmit for receive. The default configuration should be CSQ receive.

Note on using the Federal Interoperability Channels: These channels may not be used for state/state, state/local, or local/local interoperability. A Federal entity must be involved when these are used.

*VTAC11-12, VTAC33-34, and VTAC36-37 may not be used in Puerto Rico or the USVI.

• **VTAC33-38 recommended for deployable tactical repeater use only** (FCC Station Class FB2T).

• VTAC36-38 are preferred; VTAC33-35 should be used only when necessary due to interference.

All channels on this page are NARROWBAND only. Limited to 3 watts ERP North of Line A or East of Line C.

Non-Federal VHF National Interoperability Channels			
VHF Inland			
Description	**Channel Name**	**Mobile RX (MHz)**	**Mobile TX (MHz)**
Tactical – narrowband FM	VTAC17	161.8500	157.2500
Tactical – narrowband FM	VTAC17D	161.8500	161.8500

CTCSS 156.7 Hz(5A) transmit and receive.

For VTAC17/VTAC17D only: Base stations: 50 watts max, antenna HAAT 400 feet max. Mobile stations: 20 watts max, antenna HAAT 15 feet max. These channels are for tactical use and may not be operated on board aircraft in flight. These channels use narrowband FM and are available only in certain inland areas at least 100 miles from a major waterway. These channels use the same frequencies as VHF Marine channel 25, which uses wideband FM. Use only where authorized. See map on next page. In these authorized areas, interoperability communications have priority over grandfathered public coast and public safety licensees. See FCC rule 90.20(g)(3).

All channels on this page are NARROWBAND only.

Limited to 3 watts ERP North of Line A or East of Line C.

"Blanket authorization" does not apply - use of these channels must be licensed, or authorized by STA.

Counties Where VTAC17/VTAC17D May Be Used

Numbers Indicate VHF Public Coast Station Areas – see 47CFR80.371(c)(ii)

CA: Alpine, Inyo, Lassen, Mono, Plumas, Sierra

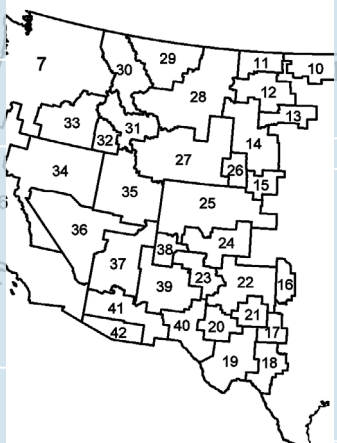
KS: Cheyenne, Gove, Logan, Sheridan, Sherman, Thomas, Wallace

MN: Kittson, Lake of the Woods, Marshall, Pennington, Polk, Red Lake, Roseau

NE: Arthur, Banner, Blaine, Box Butte, Chase, Cherry, Cheyenne, Dawes, Deuel, Dundy, Garden, Grant, Hooker, Keith, Kimball, Lincoln, Logan, McPherson, Morrill, Perkins, Scotts Bluff, Sheridan, Sioux, Thomas

OK: Beckham, Custer, Dewey, Ellis, Greer, Harmon, Harper, Jackson, Kiowa, Roger Mills, Washita, Woodward

All of CO, MT, NM, NV, UT, & WY



All counties in AZ ID & ND except:
AZ: La Paz, Yuma;
ID: Benewah, Bonner, Boundary, Clearwater , Idaho, Kootenai, Latah, Lewis, Nez Perce, & Shoshone
ND: Barnes, Cass, Dickey, Foster, Griggs, LaMoure, Pierce, Ransom, Richland, Sargent, Sheridan, Stutsman, Wells

OR: Harney, Malheur

SD: All counties except Aurora, Beadle, Bon Homme, Brookings, Brule, Buffalo, Charles Mix, Clark, Clay, Codington, Davison, Deuel, Douglas, Grant, Gregory, Hamlin, Hand, Hanson, Hughes, Hutchinson, Hyde, Jerauld, Kingsbury, Lake, Lincoln, Lyman, McCook, Miner, Minnehaha, Moody, Roberts, Sanborn, Stanley, Sully, Tripp, Turner, Union, Yankton

TX Counties – see page 28

VHF Public Safety Mutual Aid and Common Channels

WARNING: These frequencies are NOT covered by the blanket authorization for nationwide interoperability channels. A valid FCC license for these frequencies is required. Availability subject to other licensed users in the same area.

Frequency (MHz)	Usage	Channel Name	Note
155.1600 base/mobile	Search and Rescue Common (CTCSS 127.3 transmit & receive)	VSAR16 a.k.a. SAR NFM & SAR160	Not restricted to SAR by FCC; availability varies.
154.2800 base/mobile	Fire Mutual Aid	VFIRE21	Not available in Puerto Rico and the U.S. Virgin Islands.
154.2650 base/mobile		VFIRE22	
154.2950 base/mobile		VFIRE23	
154.2725 base/mobile		VFIRE24	
154.2875 base/mobile		VFIRE25	
154.3025 base/mobile		VFIRE26	
155.3400 base/mobile	EMS Mutual Aid	VMED28	May be designated for EMS Mutual Aid.
155.3475 base/mobile		VMED29	
155.4750 base/mobile	Law Enforcement Mutual Aid	VLAW31	
155.4825 base/mobile		VLAW32	

LICENSING REQUIRED - These are NOT nationwide interoperability channels - CTCSS tones vary by jurisdiction. Rules for use of these channels are contained in 47 CFR 90.20 and NTIA Manual Section 4.3.11 & 7.3.6. See also "Non-Federal VHF National Interoperability Channels" and "Non-Federal VHF Inland Interoperability Channels" on page 26 - page 28 of this document. EXCEPT for VSAR16, the recommended CTCSS tones are 156.7 receive and transmit for all channels on this page for interoperabiliy; local use may specify other tones.

NOAA Weather Radio "All Hazards" Broadcasts

NWR broadcasts National Weather Service (NWS) warnings, watches, forecasts and other non-weather related hazard information 24 hours a day. Channels WX1-WX7 are used in the US & Canada; channels WX8-WX9 are used for Canada Marine Weather broadcasts in some areas. These channels should be programmed as wideband FM (16K0F3E) RECEIVE ONLY. Some radio manufacturers number the US weather channels in the order they came into use, others number them in frequency order. For programming in land-mobile radios, frequency order is recommended.

Weather Radio Broadcasts – Receive Only (WX1-WX7 US & Canada; WX8-WX9 Canada Marine Weather)						
WX1	**WX2**	**WX3**	**WX4**	**WX5**	**WX6**	**WX7**
162.400	162.425	162.450	162.475	162.500	162.525	162.550

WX8 (Marine 21B)	**WX9** (Marine 83B)
161.650	161.775

Federal / Non-Federal SAR Command Interoperability Plan				
	Channel Name*	**Mobile RX (MHz)**	**Mobile TX (MHz)**	**CTCSS**
Connect with Gateway	IR 12**	410.8375	419.8375	167.9 Tx, CSQ Rx
	VTAC14	159.4725	159.4725	156.7 Rx and Tx
	UTAC43	453.8625	458.8625	156.7 Rx and Tx
	8TAC94 (ITAC4 before rebanding)	853.0125 (868.0125 before rebanding)	808.0125 (823.0125 before rebanding)	156.7 Rx and Tx
	VHF Marine Ch. 17***	156.8500 (this use requires FCC STA)	156.8500 (this use requires FCC STA)	none
	* If a repeater is not available, substitute the corresponding talk-around channel: IR 18 for IR 12, UTAC43D for UTAC43, 8TAC94D for 8TAC94. ****See Conditions for Use of Federal Interoperability Channels on** page 19 - page 21. ***VHF marine ch. 17 is wideband FM, emission 16K00F3E.			

Federal / Non-Federal VHF SAR Operations Interoperability Plan	
Suggested SAR Function	**Frequency (MHz)**
Ground Operations	155.1600 narrowband FM
Maritime Operations *	157.050 or 157.150 (VHF Marine ch.21A or 23A) as specified by USCG Sector Commander
Air Operations – civilian	123.100 MHz AM (may not be used for tests or exercises)
Air Operations – USCG/Military	345.0 MHz AM for initial contact only, then move to 282.8 MHz AM or other working channel
Air rescue assets to air rescue assets (deconfliction)	As charted on standard air chart or MULTICOM 122.850 (south or west sector) & 122.900 MHz (north or east sector), or as specified by FAA. 122.850 may not be used for tests or exercises
Ground to Air SAR working channel	157.175 83A (21A, 23A, 81A alternates as specified by local USCG Sector Commander) **
Ground to Maritime SAR working channel	157.050 21A (23A, 81A, 83A alternates as specified by local USCG Sector Commander) **
Maritime/Air/Ground SAR working channel *	157.175 83A (21A, 23A, 81A alternates as specified by local USCG Sector Commander) **
EMS / Medical Support	155.3400 narrowband FM
Hailing* & DISTRESS only - Maritime/Air/Ground	156.800 VHF Marine channel 16 *

* **Use VHF Marine ch.16 to make contact (30 seconds max.), then move to appropriate working channel as directed by local USCG Sector Commander. Non-maritime use of any VHF Marine channel requires FCC Special Temporary Authority or appropriate license. VHF marine channels use wideband FM, emission 16K0F3E**

** VHF Marine channels: 16=156.800 21A=157.050 22A=157.100 23A=157.150 81A=157.075 82A=157.125 83A=157.1750

Direction from USCG, FCC, or FAA overrides information in this table. This table does not convey authority to operate.

VHF Incident Response (IR) Federal Interoperability Channels				
Suggested Assignment (subject to availability & local plans)	**Channel Name**	**Note**	**Mobile RX (MHz)**	**Mobile TX (MHz)**
Incident Calling	NC 1	Calling	169.5375	164.7125
Incident Command	IR 1		170.0125	165.2500
Medical Evacuation Control	IR 2		170.4125	165.9625
Logistics Control	IR 3		170.6875	166.5750
Interagency Convoy	IR 4		173.0375	167.3250
Incident Calling (Direct)	IR 5	Direct for NC 1 Calling	169.5375	169.5375 (S)
Incident Command (Direct)	IR 6	Direct for IR 1	170.0125	170.0125 (S)
Medical Evacuation Control (Direct)	IR 7	Direct for IR 2	170.4125	170.4125 (S)
Logistics Control (Direct)	IR 8	Direct for IR 3	170.6875	170.6875 (S)
Interagency Convoy (Direct)	IR 9	Direct for IR 4	173.0375	173.0375 (S)

See "Conditions for Use of Federal Interoperability Channels" on page 19 - page 21.

Default operation should be carrier squelch receive, CTCSS 167.9 transmit. If the user can enable/disable CTCSS without reprogramming the radio, the indicated CTCSS tone also could be programmed for receive, and the user instructed how and when to enable/disable.

All channels on this page are NARROWBAND only.

VHF Law Enforcement (LE) Federal Interoperability Channels					
Description	**Channel Name**	**Note**	**Mobile RX (MHz)**	**Mobile TX (MHz)**	**CTCSS or NAC**

(continued)

TX NAC: $293 ($659_{10}$). RX NAC $F7E ($3966_{10}$). These channels are reserved for air-ground communications to be used by low-altitude aircraft and ground based stations: See FCC rule 90.531(7). (i) Airborne use of these channels is limited to aircraft flying at or below **457 meters (1500 feet) above ground level.** (ii) **Aircraft are limited to 2 watts effective radiated power (ERP)** when transmitting while airborne on these channels. (iii) Aircraft may transmit on either the mobile or base transmit side of the channel pair. (iv) States are responsible for the administration of these channels. *These are NOT nationwide interoperability channels.*

Air - Ground	7AG85D	774.11875	774.11875
Air - Ground	7AG88	774.61875	804.61875
Air - Ground (LZ)*	7AG88D	774.61875	774.61875

* 7AG88D is recommended for **Landing Zone** use.

TX NAC: $293 ($659_{10}$). RX NAC $F7E ($3966_{10}$). These channels are reserved for air-ground communications to be used by low-altitude aircraft and ground based stations: See FCC rule 90.531(7). (i) Airborne use of these channels is limited to aircraft flying at or below **457 meters (1500 feet) above ground level.** (ii) **Aircraft are limited to 2 watts effective radiated power (ERP)** when transmitting while airborne on these channels. (iii) Aircraft may transmit on either the mobile or base transmit side of the channel pair. (iv) States are responsible for the administration of these channels. *These are NOT nationwide interoperability channels.*

Non-Federal 800 MHz National Mutual Aid Repeater Channels			
Description	**Ch. Name**	**Mobile RX (MHz)***	**Mobile TX (MHz)***
Calling	8CALL90	851.0125 (866.0125)	806.0125 (821.0125)
Calling – Direct	8CALL90D	851.0125 (866.0125)	851.0125 (866.0125)
Tactical	8TAC91	851.5125 (866.5125)	806.5125 (821.5125)
Tactical – Direct	8TAC91D	851.5125 (866.5125)	851.5125 (866.5125)
Tactical	8TAC92	852.0125 (867.0125)	807.0125 (822.0125)
Tactical – Direct	8TAC92D	852.0125 (867.0125)	852.0125 (867.0125)
Tactical	8TAC93	852.5125 (867.5125)	807.5125 (822.5125)
Tactical – Direct	8TAC93D	852.5125 (867.5125)	852.5125 (867.5125)
Tactical	8TAC94	853.0125 (868.0125)	808.0125 (823.0125)
Tactical – Direct	8TAC94D	853.0125 (868.0125)	853.0125 (868.0125)

CTCSS 156.7(5A) receive and transmit.

*The frequency in parenthesis, which is 15 MHz higher, is the frequency used before rebanding - channel names were ICALL, ITAC1 - ITAC4. Wideband FM 20K0F3E before and after rebanding.

25 Cities Project Federal Interoperability Channels

The 25 Cities Project Federal Interoperability Channels were developed through the Department of Justice "25 Cities" project to support local, state, federal, and tribal voice communications interoperability. Each metropolitan area has agreed upon policies and procedures regarding use of these channels. Most 25 Cities VHF channels are accessible by non-VHF users via permanent or ad hoc patching capabilities. All agencies interested in using these frequencies, who are not currently participating in the 25 Cities effort, should contact the local FBI Radio Manager prior to programming any equipment. **Please note that three 25 Cities channels are on VHF Law Enforcement (LE) Federal Interoperability Channel pairs: Baltimore (B AFIOLE3), Boston (BS IO LE4), and Washington DC (DCIO2LE2)**. For frequencies and programming details or other questions regarding the project, contact:

Quintin R. Wyckoff, FBI FED-IO Program Coordinator
703-985-1467 QUINTIN.WYCKOFF@IC.FBI.GOV

Information as of March 17, 2015

City	Channel Name
ATLANTA	ATL FIO (VHF P25 Voted System)
BALTIMORE	BAFIOLE3 (VHF P25 Voted System)
BOSTON	BPD FIO (VHF Analog Voted System)
BOSTON	BS IO LE4 (VHF P25 Voted System)

(continued)

25 Cities Project Federal Interoperability Channels – continued

City	Channel Name
CHICAGO	CG-COM-N, CG-COM-C, CG-COM-S (VHF P25 Multicast Voted System)
CHICAGO	CG-TAC-N, CG-TAC-C, CG-TAC-S (VHF P25 Multicast Voted System)
DALLAS	DFW EAST (VHF P25 Voted System)
DALLAS	DFW WEST (VHF P25 Voted System)
DENVER	DEN IO-N, DEN IO-E, DEN IO-C, DEN IO-S, DEN IO-W (VHF P25 Multicast Voted System)
EL PASO	EP FIO-W, EP FIO-E (VHF P25 Multicast Voted System)
HARTFORD	CFedcom-N, CFedcom-S, CFedcom-E, CFedcom-W (VHF P25 Multicast Voted System)

(continued)

25 Cities Project Federal Interoperability Channels – continued

City	Channel Name
HONOLULU	HNL FIO (VHF P25 Stand-alone 125 watt repeater)
HONOLULU	HNL FIO2 (VHF P25 Stand-alone 125 watt repeater)
HONOLULU	LE 4 (VHF P25 Transportable 125 watt repeater)
HONOLULU	HNL FIRE (VHF Analog Voted System)
HOUSTON	HOU CMD (VHF P25 Voted System)
HOUSTON	HOU PAT (VHF P25 Voted System)
JACKSONVILLE	JAX FIO (VHF P25 Voted System)
LOS ANGELES	LA FIO1 (VHF P25 Voted System)
LOS ANGELES	LA FIO2 (VHF P25 Voted System)
LOS ANGELES	LA FIO3 (VHF P25 Voted System)
MIAMI	MIA FIO (VHF P25 Voted System)
MINNEAPOLIS / ST PAUL	FEDCOM-MP, FEDCOM-SP (VHF P25 Multicast Voted System)

(continued)

25 Cities Project Federal Interoperability Channels – continued

City	Channel Name
NATIONWIDE	J-SMART (Talkgroup # 15) (LightSquared MSAT Radio PTT)
NEWARK NJ	NK FIO (Northern New Jersey) (VHF P25 Voted System)
NEW ORLEANS	NOLA FIO (VHF P25 Voted System)
NEW YORK	NYC FIO (NYC), NYC FIO-N (Orange-Putnam), NYC FIO-E (Suffolk County), NYC FIO-S (Central NJ) (VHF P25 Multicast Voted system)
NEW YORK	NYC FIO2 (VHF P25 Voted System)
NORFOLK / HAMPTON ROADS	HRN FIO (VHF P25 Voted System)
ORLANDO	ORL FIO (VHF P25 Voted System)
PHILADELPHIA	PH FIO (VHF P25 Voted System)
RICHMOND VA	RH-FIO-PB-LE5, RH-FIO-RH-LE4 (VHF P25 Multicast Voted System)
SAN DIEGO	CALAW1, VLAW31, 800 FIREMARS, 800 CLEMARS (VHF Analog & 800 MHz Wideband Analog Voted System with Transmitter Selected by RCS Dispatchers)

(continued)

25 Cities Project Federal Interoperability Channels – continued

City	Channel Name
SAN FRANCISCO	SF MAV-A (VHF Analog or Digital Stand-alone 125 watt repeater)
SAN FRANCISCO	SF MAU-A (UHF Analog or Digital Stand-alone 125 watt repeater)
SAN FRANCISCO	CLEMARS 7 (LLAW1) (Low Band Wideband Analog Stand-alone repeater)
SAN FRANCISCO	SF MAT-A (UHF-T Band Wideband Analog Stand-alone 125 watt repeater)
SAN FRANCISCO	8TAC94 (800 MHz Wideband Analog Stand-alone 125 watt repeater)
SAN FRANCISCO	SF FED-V (VHF P25 Stand-alone 125 watt repeater)
SAN FRANCISCO	SF FED-U (UHF P25 Stand-alone 125 watt repeater)
SAN FRANCISCO	All of the above repeaters can be networked together.
SAN FRANCISCO	SF FED-ED, SF FED-ES, SF FED-ET, SF FED-EW (VHF P25 Multicast Voted System)

(continued)

25 Cities Project Federal Interoperability Channels – continued

City	Channel Name
ST LOUIS	STL CALL (VHF P25 Voted System) 8CALL90 (800 MHz Wideband Simulcast Repeater System)
ST LOUIS	STL TAC (VHF P25 Voted System) 8TAC91 (800 MHz Wideband Simulcast Repeater System)
TAMPA	TAM FIO (VHF P25 Voted System)
WASHINGTON DC	DC IO-1 (VHF P25 Voted System)
WASHINGTON DC	DCIO2LE2 (VHF P25 Voted System)

TGID – Talkgroup ID

$0001	**1_{10}**	default
$0000	**0_{10}**	no-one, talkgroup with no users – used for individual call
$FFFF	**65535_{10}**	a repeater with this NAC will allow incoming signals to be repeated with the NAC intact

Unit ID

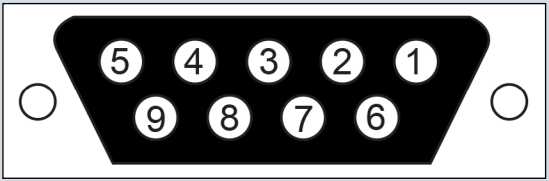
$000000	**0_{10}**	default
$000001-$98767F	**1_{10} - 9991807$_{10}$**	no-one, talkgroup with no users – used for individual call
$989680-$FFFFFE	**10000000$_{10}$ - 16777214$_{10}$**	a repeater with this NAC will allow incoming signals to be repeated with the NAC intact
$FFFFFF	**16777215$_{10}$**	designates everyone – used when implementing a group call with a TGID3

Note: Project 25 System Administrators should be aware of possible Unit ID conflicts when conducting operations with neighboring jurisdictions. System administrators should coordinate Unit IDs with agencies likely to operate on their system(s) to address any radio Unit ID conflicts.

"$" indicates hexidecimal values, "10" subscript indicates decimal value.

RS-232 Connectors (DB25 and DE9)

"Front" refers to the ends with the pins; "rear" refers to the end with the cable. The following is a view of the pins, looking at the front of the female connector (rear of male):



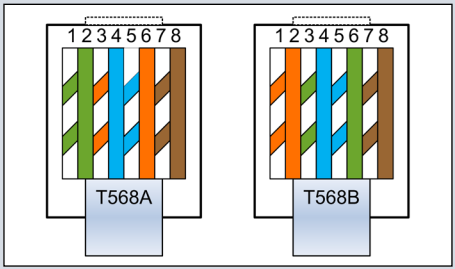
same for DB25, except top pins 13 - 1, bottom 25 - 14 (left to right)

DE9	DB25	Signal
1	8	Carrier Detect
2	3	Receive Data
3	2	Transmit Data*
4	20	Data Terminal Ready*
5	1,7	Ground **
6	6	Data Set Ready
7	4	Request to Send*
8	5	Clear to Send
9	22	Ring Indicator

* An output from the computer to the outside world.

** On the DB25, 1 is the protective ground, 7 is the signal ground.

RJ-45 Wiring					
		T568A (less common)		T568B (more common)	
Pin	Pair	*Color*	*Name*	Color	Name
1	2	*white/green*	*RecvData +*	white/orange	TxData +
2	2	*green*	*RecvData -*	orange	TxData -
3	3	*white/orange*	*TxData +*	white/green	RecvData +
4	1	*blue*		blue	
5	1	*white/blue*		white/blue	
6	3	*orange*	*TxData -*	green	RecvData -
7	4	*white/brown*		white/brown	
8	4	*brown*		brown	
Note that the odd pin numbers are always the white-with-stripe color.					



A straight cable has both ends the same – both T568A (older standard or both T568B (newer standard). A crossover cable has one end wired as T568A, the other as T568B.

IP Addresses - Private Networks

These IP address ranges may be used in private networks. They may not be routed to the public internet.

IPv4 Address Range	Number of Addresses	Subnet Mask
10.0.0.0 - 10.255.255.255	16,777,216	255.0.0.0
172.16.0.0 - 172.31.255.255	1,048,576	255.240.0.0
192.168.0.0 - 192.168.255.255	65,536	255.255.0.0

IPv6 address block fc00::/7 is reserved for Unique Local Addresses

WiFi 2.4 GHz Non-Overlapping Channels			
Protocol	**Bandwidth**	**Channel**	**Center Freq**
802.11b	22 MHz	1	2412 MHz
802.11b	22 MHz	6	2437 MHz
802.11b	22 MHz	11	2462 MHz
802.11g/n	20 MHz	1	2412 MHz
802.11g/n	20 MHz	6	2437 MHz
802.11g/n	20 MHz	11	2462 MHz
802.11n	40 MHz	3	2422 MHz

Use 5 GHz WiFi instead of 2.4 GHz whenever possible to avoid interference from non-WiFi devices such as cordless phones that operate in the 2.4 GHz band.

Public Domain Name System (DNS) Servers

DNS servers resolve IP addresses from hostnames to numeric IP addresses. Firewall ports 53/UDP and 53/TCP must be open. Others are available; no endorsement implied.

Provider	Primary DNS Server	Secondary DNS Server
Level3	4.2.2.1	4.2.2.2
Google (IPv4)	8.8.8.8	8.8.4.4
Google (IPv6)	2001:4860:4860::8888	2001:4860:4860::8844
OpenDNS Home	208.67.222.222	208.67.220.220

Public Network Time Protocol (NTP) Servers

Others are available; no endorsement implied.

Domain Name	IP Address
0.pool.ntp.org	(randomly assigned)
1.pool.ntp.org	(randomly assigned)
2.pool.ntp.org	(randomly assigned)
3.pool.ntp.org	(randomly assigned)
tick.usno.navy.mil	192.5.41.40
tock.usno.navy.mil	192.5.41.41
bigben.cac.washington.edu	140.142.16.34
ntp-nasa.arc.nasa.gov	198.123.30.132

CISCO Tactical Operations

Cisco Tactical Operations provides temporary, mission-critical voice, data and video service to first responder, state, local, and Federal agencies, critical infrastructure and humanitarian aid organizations. Services may be provided for pre-planned and disaster incidents, subject to availability. This is a best-effort, pro-bono service.

For additional information see http://www.cisco.com/go/tacops
or email tacops-info@cisco.com

Emergency Contact Information

Email: emergencyresponse@cisco.com
24x7 Hotline: 1-919-392-4646

Be prepared to provide:

- Requesting individual's name, agency, title, phone, email
- Exact location(s) of incident
- Business need (e.g. telephone, internet, radio interoperability, video surveillance)
- Approximate number of users
- Expected duration
- Current ground situation re: logistics, security, personnel support etc.

Cellular Telephone Emergency Response

Some cellular telephone companies have transportable cell sites (Cellular On Wheels – COWs, Cellular on Light Trucks – COLTs, etc.) that can be deployed during disasters, emergencies, and special events. Local jurisdictions are encouraged to coordinate with their established service provider representatives for local events; however, the U.S. Department of Homeland Security – National Coordinating Center for Telecommunications will assist jurisdictions with referrals to corporate level contacts for wireless/wireline service provider representatives if needed.

The NCC Watch can be reached 24x7 at 1-703-235-5080 or e-mail NCC@hq.dhs.gov

Satellite Phone Dialing Instructions

Iridium PIN (default) is 1111

(enter when powering-on the Iridium Subscriber Unit)

From a US Landline

Two-Stage Dialing: 1-480-768-2500, at prompt 12-digit Iridium number

To an Iridium phone directly as an International Call

011 + 8816xxxxx (Iridium Phone Number)

To an Iridium phone via toll call to Chandler AZ ("two-stage dialing"):

1-480-768-2500, follow prompts to enter Iridium phone number

To an M4 phone directly as an International Call

011 + 870 + 76xxxxxxx (Mobile Number)

From an M4 or BGAN: [Note - Cannot call Toll-Free numbers]

To a US Phone number:

00 + 1 + (10-digit US phone number) + #

To an Iridium phone directly

00 + 8816xxxxxxx (Iridium Phone Number) + #

To an M4 phone directly

00 + 870 + 76xxxxxxx (Mobile Number) + #

From an Iridium provisioned commercially

To a US Phone number

00 + 1 + xxx.xxx.xxxx (US phone number)

To an Iridium phone directly

00 + 8816xxxxxxx (Iridium Phone Number)

To an M4 phone directly

00 + 870 + 76xxxxxxx (Mobile Number)

Test call - no airtime charge: 00 + 1 + 480.752.5105

From an Iridium provisioned by DOD

ISU (Iridium Subscriber Unit) to DSN

00 + 696 + (DSN Area Code) + (DSN 7-digit number)

ISU to U.S. Domestic

00 + 697 + (U.S. Area Code) + (7-digit US number)

ISU to International Long Distance (ILD)

00 + 698 + (Country Code) + ("National Destination Code" or "City Code") + (Subscriber Number)

ISU to INMARSAT

00 + 698 + 870 + (INMARSAT subscriber number)

ISU to Local Hawaii

00 + 699 + (7-digit local commercial number)

1-800 toll-free 00 + 699 + 1+ 800 + (7-digits)

ISU to ISU, handset-to-handset

00 + (12-digit ISU subscriber number, e.g., 8816 763-xxxxx)

INMARSAT Country Code

All INMARSAT satellite telephones now use country code 870.

The Ocean Region Codes were discontinued January 1, 2009:

871 Atlantic Ocean Region – East [AOR-East]

872 Pacific Ocean Region [POR]

873 Indian Ocean Region [IOR]

874 Atlantic Ocean Region – West [AOR-West]

Inmarsat Customer Care Helpline - international direct dialing from USA to London, United Kingdom: 011 44 20 7728 1030

INMARSAT-M Service Codes	
00	Automatic Calls
11	International Operator

Priority Telecommunications Programs

For assistance and information on all DHS Office of Emergency Communications Priority Telecommunications programs, contact the DHS Priority Telecommunications Service Center at 1-866-627-2255, 703-676-2255, or gwids@saic.com

GETS - Govt. Emergency Telecommunications Service

http://www.dhs.gov/gets

(see next page for GETS access info)

WPS - Wireless Priority Service

http://www.dhs.gov/wps

(see next page for WPS access info)

GETS and WPS provide priority on voice networks - not data.

TSP - Telecommunications Service Priority

http://www.dhs.gov/tsp

For TSP restoration service, contact the telephone service provider with the TSP authorization codes for the affected circuits and request TSP service. TSP restoration service is available only for circuits that have been enrolled in the TSP program before the outage occurred.

For TSP priority provisioning, contact the TSP Program Office at 1-703-235-5613 or 1-703-235-5359 – outside of normal business hours, contact the NCC Watch at 1-703-235-5080.

Line-of-Sight Formulas

Visual Line-of-Sight

Approximate distance in miles = 1.33 x √ (height in feet)

Radio Line-of-Sight

D = √(2Hr) + √(2Ht)
Where:
D = approximate distance (range) to radio horizon in miles
Hr = height of receive antenna in feet
Ht = height of transmit antenna in feet

These are rough estimates which do not take into account power or frequency.

Range (miles)	Tx Ant. Height (ft)	Rx Ant. Height (ft)
8	10	5.5
10	20	5.5
11	30	5.5
12	40	5.5
13	50	5.5
16	75	5.5
17	100	5.5

Range (miles)	Tx Ant. Height (ft)	Rx Ant. Height (ft)
21	150	5.5
23	200	5.5
28	300	5.5
32	400	5.5
35	500	5.5
42	750	5.5
48	1000	5.5

Notice to Airmen (NOTAM) Filing Instructions

File a Notice to Airmen (NOTAM) with the FAA to alert aircraft pilots of any hazards (such as a temporary tower or tethered antenna platform).

Filing Instructions:

1. Before calling FAA have Tower Registration number or ASR number, which is the 7-digit number assigned to the tower by the FCC; and the nearest airport to tower.
2. Call **1-877-4-US-NTMS (1-877-487-6867)** - you will be prompted to enter state abbreviation (use letters on telephone keypad - page 73) or to verbally indicate a state.
3. Log the file number you will be given by the Flight Service Center attendant.
4. NOTAMs are valid for 15 days and will expire unless a new NOTAM is filed.

When filing a NOTAM for the erection of obstacles near airfields **including temporary heliports** it may be helpful to have the latitude, longitude, height above ground level, and type of obstruction lighting used (steady red, flashing etc.)

NOTAMs are issued (and reported) for a number of reasons, such as:

- hazards such as air-shows, parachute jumps, kite flying, lasers, rocket launches etc
- inoperable radio navigational aids
- inoperable lights on tall obstructions
- temporary erection of obstacles near airfields (e.g., cranes, portable towers)

FAA NOTAMs, ARTCC Notices, TFRs and Special Notices
https://pilotweb.nas.faa.gov/PilotWeb/

Defense Internet NOTAM Service
https://www.notams.faa.gov/dinsQueryWeb/

Other FAA telephone numbers:
Flight Service Stations: 1-800-WX-BRIEF (1-800-992-7433)
FAA Main Number: 1-866-TELL-FAA (1-866-835-5322)

COMMONLY USED FREQUENCIES

Aviation Frequencies

121.5 Emergency & Distress

122.9 SAR Secondary and Training

123.1 SAR

122.925 – for use only for communications with or between aircraft when coordinating natural resources programs of Federal or State natural resources agencies, including forestry management and fire suppression, fish and game management and protection and environmental monitoring and protection.

Typical Uses	Fixed Wing	Rotary Wing
Air-to-Air	122.750 F	
	122.850 M	122.850 M
	122.925 M	122.925 M
	122.975 U	122.975 U
		123.025 A
	123.075 U	123.075 U
Air-to-Ground	122.850 M	122.850 M
	122.925 M	122.925 M
	122.975 U	122.975 U
		123.025 A
	123.075 U	123.075 U

A – Helicopter air-to-air, air traffic control operations.
F – Fixed-wing air-to-air. M – Multicom. U – Unicom.
Ask FAA/FCC for emergency use of 123.3 or 123.5 (flight training).
All frequencies on this page use AM (emission designator 6K00A3E).

VHF Marine Channel Listing

This chart summarizes a portion of the FCC rules – 47 CFR 80.371(c) and 80.373(f)

Type of Message	Appropriate Channels *
DISTRESS SAFETY AND CALLING - Use this channel to get the attention of another station (calling) or in emergencies (distress and safety).	16
INTERSHIP SAFETY - Use this channel for ship-to-ship safety messages and for search and rescue messages to ships and aircraft of the Coast Guard.	6
COAST GUARD LIAISON - Use this channel to talk to the Coast Guard (but first make contact on Channel 16).	22A
COAST GUARD - These channels are Coast Guard working channels, not available to commercial or non-commercial vessels for normal use.	21A, 23A, 81A, 83A
U.S. Government - Environmental protection operations.	81A
U.S. Government - This channel is a working channel for U.S. Government vessels and U.S. Government coast stations only.	82A
NONCOMMERCIAL - Working channels for voluntary boats. Messages must be about the needs of the ship. Typical uses include fishing reports, rendezvous, scheduling repairs and berthing information. Use Channels 67 and 72 only for ship-to-ship messages.	9[6], 67[9],68, 69, 71[8], 72, 78A, 79A[4], 80[4]

Type of Message	Appropriate Channels *
COMMERCIAL - Working channels for working ships only. Messages must be about business or the needs of the ship. Use channels 8, 67, 72 and 88A only for ship-to-ship messages.	1[5], 7A, 8, 9, 10, 11, 18A, 19A, 63[5], 67[7], 79A, 80A, 88A[1]
PUBLIC CORRESPONDENCE (MARINE OPERATOR) - Use these channels to call the marine operator at a public coast station. By contacting a public coast station, you can make and receive calls from telephones on shore. Except for distress calls, public coast stations usually charge for this service.	24, 25, 26, 27, 28, 84, 85, 86
PORT OPERATIONS - These channels are used in directing the movement of ships in or near ports, locks or waterways. Messages must be about the operational handling movement and safety of ships. In certain major ports, Channels 11, 12 and 14 are not available for general port operations messages. Use channel 20 only for ship-to-coast messages. Channel 77 is limited to intership communications to and from pilots.	1[5], 5[3], 12, 14, 20, 63[5], 65, 66, 73, 74, 75[10],76[10], 77
NAVIGATIONAL - (Also known as the bridge-to-bridge channel.) This channel is available to all ships. Messages must be about ship navigation, for example, passing or meeting other ships. You must keep your messages short. Your power output must not be more than one watt. This is also the main working channel at most locks and drawbridges.	13, 67

Type of Message	Appropriate Channels *
MARITIME CONTROL - This channel may be used to talk to ships and coast stations operated by state or local governments. Messages must pertain to regulation and control, boating activities, or assistance to ships.	17
DIGITAL SELECTIVE CALLING - Use this channel for distress and safety calling and for general purpose calling using only digital selective calling techniques.	70
WEATHER - On these channels you may receive weather broadcasts of the National Oceanic and Atmospheric Administration. These channels are only for receiving. You cannot transmit on them.	WX1 through WX7

Footnotes

1. Not available in the Great Lakes, St. Lawrence Seaway, or the Puget Sound and the Strait of Juan de Fuca and its approaches.
2. Only for use In the Great Lakes, St Lawrence Seaway, and Puget Sound and the Strait of Juan de Fuca and its approaches.
3. Available only in the Houston and New Orleans areas.
4. Available only in the Great Lakes.
5. Available only in the New Orleans area.

6. Available for intership, ship, and coast general purpose calling by noncommercial ships.
7. Available only In the Puget Sound and the Strait of Juan de Fuca.
8. Available for port operations communications only within the U.S. Coast Guard designated VTS radio protection area of Seattle (Puget Sound). Normal output must not exceed 1 watt.
9. Available for navigational communications only in the Mississippi River/Southwest Pass/Gulf outlet area.
10. Available for navigation-related port operations or ship movement only. Output power limited to 1 watt.

* "A" indicates simplex use of the ship station transmit frequency of an international duplex channel. Used in U.S. waters only.

December 21, 2010. Adapted from
http://wireless.fcc.gov/services/index.htm?job=service_bandplan&id=ship_stations

Shipboard repeaters: 457.525 457.550 457.575 457.600 MHz
Inputs are +10.225 MHz (foreign vessels may use +10.0 MHz offset – not permitted in U.S. waters).

Maritime freqs. assignable to aircraft:

(HF) 2.738 2.830 3.023 4.125 5.680 MHz
(VHF) channels 6 8 9 16 18A 22A 67 68 72 & 88A
See 47CFR80.379 for restrictions.

Maritime Distress Frequencies - Radiotelephone
(HF, USB - 2K80J3E) 2182, 4125, 6215, 8291, 12290, 16420 kHz
(VHF, FM wideband - 16K00F3E) 156.800 MHz (Channel 16)

VHF Marine Channels & Frequencies

Source: http://www.navcen.uscg.gov/?pageName=mtVhf

Channel Number *	Ship Transmit MHz	Ship Receive MHz	Use
01A	156.050	156.050	Port Operations and Commercial, VTS. Available only in New Orleans/Lower Mississippi area
05A	156.250	156.250	Port Operations or VTS in the Houston, New Orleans and Seattle areas
6	156.300	156.300	Intership Safety
07A	156.350	156.350	Commercial
8	156.400	156.400	Commercial (Intership only)
9	156.450	156.450	Boater Calling. Commercial and Non-Commercial
10	156.500	156.500	Commercial
11	156.550	156.550	Commercial. VTS in selected areas
12	156.600	156.600	Port Operations. VTS in selected areas
13	156.650	156.650	Intership Navigation Safety (Bridge-to-bridge). Ships >20m length maintain a listening watch on this channel in US waters.

* "A" indicates simplex use of the ship station transmit frequency of an international duplex channel. Used in U.S. waters only.

Channel Number *	Ship Transmit MHz	Ship Receive MHz	Use
14	156.700	156.700	Port Operations. VTS in selected areas.
15	--	156.750	Environmental (Receive only). Used by Class C EPIRBs.
16	156.800	156.800	International Distress, Safety and Calling. Ships required to carry radio, USCG, and most coast stations maintain a listening watch on this channel.
17	156.850	156.850	State & Local Government Maritime Control
18A	156.900	156.900	Commercial
19A	156.950	156.950	Commercial
20	157.000	161.600	Port Operations (duplex)
20A	157.000	157.000	Port Operations
21A	157.050	157.050	U.S. Coast Guard only
22A	157.100	157.100	Coast Guard Liaison and Maritime Safety Information Broadcasts. Broadcasts announced on channel 16.
23A	157.150	157.150	U.S. Coast Guard only
24	157.200	161.800	Public Correspondence (Marine Operator)

* "A" indicates simplex use of the ship station transmit frequency of an international duplex channel. Used in U.S. waters only.

Channel Number *	Ship Transmit MHz	Ship Receive MHz	Use
25	157.250	161.850	Public Correspondence (Marine Operator)
26	157.300	161.900	Public Correspondence (Marine Operator)
27	157.350	161.950	Public Correspondence (Marine Operator)
28	157.400	162.000	Public Correspondence (Marine Operator)
63A	156.175	156.175	Port Operations and Commercial, VTS. Available only in New Orleans/Lower Mississippi area.
65A	156.275	156.275	Port Operations
66A	156.325	156.325	Port Operations
67	156.375	156.375	Commercial. Used for bridge-to-bridge communications in lower Mississippi River. Intership only.
68	156.425	156.425	Non-Commercial
69	156.475	156.475	Non-Commercial
70	156.525	156.525	Digital Selective Calling (voice communications not allowed)
71	156.575	156.575	Non-Commercial
72	156.625	156.625	Non-Commercial (intership only)

* "A" indicates simplex use of the ship station transmit frequency of an international duplex channel. Used in U.S. waters only.

Channel Number *	Ship Transmit MHz	Ship Receive MHz	Use
73	156.675	156.675	Port Operations
74	156.725	156.725	Port Operations
77	156.875	156.875	Port Operations (intership only)
78A	156.925	156.925	Non-Commercial
79A	156.975	156.975	Commercial. Non-Commercial in Great Lakes only
80A	157.025	157.025	Commercial. Non-Commercial in Great Lakes only
81A	157.075	157.075	U.S. Government only - Environmental protection operations.
82A	157.125	157.125	U.S. Government only
83A	157.175	157.175	U.S. Coast Guard only
84	157.225	161.825	Public Correspondence (Marine Operator)
85	157.275	161.875	Public Correspondence (Marine Operator)
86	157.325	161.925	Public Correspondence (Marine Operator)
87A	157.375	157.375	Public Correspondence (Marine Operator)
88A	157.425	157.425	Commercial, intership only.

* "A" indicates simplex use of the ship station transmit frequency of an international duplex channel. Used in U.S. waters only.

Channel Number *	Ship Transmit MHz	Ship Receive MHz	Use
AIS 1	161.975	161.975	Automatic Identification System (AIS)
AIS 2	162.025	162.025	Automatic Identification System (AIS)
* "A" indicates simplex use of the ship station transmit frequency of an international duplex channel. Used in U.S. waters only.			

Shipboard repeaters:

457.525 457.550 457.575 457.600 MHz, wideband FM.
Inputs are +10.225 MHz
Foreign vessels may use +10.0 MHz offset outside U.S. waters.

On-board Communications:

Narrowband FM : 457.5375, 457.5625, 467.5375, 467.5625 MHz

Maritime freqs. assignable to aircraft:

(HF) 2.738 2.830 3.023 4.125 5.680 MHz
(VHF) channels 6 8 9 16 18A 22A 67 68 72 & 88A
See 47CFR80.379 for restrictions.

Maritime Distress Frequencies - Radiotelephone:

(HF, USB - 2K80J3E) 2182, 4125, 6215, 8291, 12290, 16420 kHz

(VHF, FM wideband - 16K00F3E) 156.800 MHz (Channel 16)

Multi-Use Radio Service (MURS)

151.820 MHz

151.880 MHz

151.940 MHz

154.570 MHz (shared with business band)

154.600 MHz (shared with business band)

Maximum power output 2 watts.

Narrowband on 151 MHz frequencies.

Narrowband or wideband on the 154 MHz frequencies.

External gain antennas may be used (must be no more than 60 feet above ground or 20 feet above the structure on which it is mounted).

Voice or data, except:

- no store-and-forward packet operation
- no continuous carrier operation
- no interconnection with the public switched network
- no use aboard aircraft in flight

Authorized emission types:

- A1D, A2B, A2D, A3E, F2B, F1D, F2D, F3E, G3E.

Personal or business use.

Equipment must be certificated per FCC rules Part 95, Subpart J.

No license required.

GMRS Frequencies

Authorized bandwidth: 20 kHz. Repeater outputs (inputs are +5 MHz):
462.550 462.575 462.600 462.625 462.650 462.675* 462.700 462.725
* nationwide traveler's assistance; if CTCSS is required, try 141.3 Hz.

Simplex prohibited on repeater inputs.
Interstitial frequencies (simplex, not more than 5 watts):
462.5625 .5875 .6125 .6375 .6625 .6875 .7125 (shared with FRS)
North of Line A / East of Line C: 462.650, 467.650, 462.700, 467.700 may not be used; small control stations limited to 5 watts.

FRS Frequencies

Authorized bandwidth: 12.5 kHz. Channels 1-14: Power limit: 0.5 watts ERP
462.5625 /5875 /6125 /6375 /6625 /6875 /7125 (shared with GMRS)
467.5625 /5875 /6125 /6375 /6625 /6875 /7125

Railroad Frequencies

160.215(ch.007)-161.565(ch.097), every 15 kHz
Interstitial narrowband channels between ch. 002-097 are offset 7.5 kHz.

161.205 Railroad Police Mutual Aid (channel 073)
Ch. 002-006 are used in Canada only:

159.810 159.930 160.050 160.185 160.200

452.325 / 457.325
452.375 / 457.375
452.425 / 457.425
452.475 / 457.475

452.775 / 457.775
452.825 / 457.825
452.875 / 452.875
452.900 / 457.900

452.8500
452.8375 - low power
452.8625 - low power
452.8875 - low power

(telemetry / remote control / remote indicator frequencies omitted)

SAR (Search And Rescue) Frequencies

Land SAR

Typical frequencies are: 155.160, .175, .205, .220, .235, .265, .280, or .295
If CTCSS is required try 127.3 Hz (3A).

Air SAR

3023, 5680, 8364 kHz upper sideband (lifeboat/survival craft),
4125 kHz upper sideband (distress/safety with ships and coast stations)
121.5 MHz emergency and distress
122.9 MHz SAR secondary & training
123.1 MHz SAR primary

Water SAR

156.300 (VHF Marine ch. 06) Safety and SAR
156.450 (VHF Marine ch. 09) Non-commercial supplementary calling
156.800 (VHF Marine ch. 16) DISTRESS and calling
156.850 (VHF Marine ch. 17) State & Local Government Maritime Control
157.100 (VHF Marine ch. 22A) Coast Guard Liaison

VHF Marine Channels

6, 9, 15, 16, 21A, 22A (USCG Liaison), 23A, 81A, 83A

USCG Auxiliary

138.475, 142.825, 143.475, 149.200, 150.700

USCG/DOD Joint SAR

345.0 MHz AM initial contact, 282.8 MHz AM working

Military SAR

40.50 wideband FM	US Army/USN SAR
138.450 AM, 138.750 AM	USAF SAR

Maritime HF and VHF Distress Frequencies

Global Maritime Distress & Safety System, Digital Selective Calling (DSC) & Radiotelephone Channels - **for use only by vessels and coast stations authorized in the Maritime Services** (FCC Part 80, NTIA 7.5 and 8.2.29). These are not nationwide interoperability channels, and are not for land-based public safety agencies. These frequencies may be programmed only into radios certificated for Part 80 operations, and only by a person holding a First or Second Class Radiotelegraph Operator's Certificate, Radiotelegraph Operator License, or General Radiotelephone Operator License.

The simplex DSC frequencies except 2187.5 and 16804.5 kHz are monitored by the US Coast Guard and are used for digital alerting and calling for distress, urgency and safety. Once the DSC call has been sent, the corresponding radiotelephone frequency is used for voice communications.

The simplex voice frequencies are used for distress and safety communications, and except for 2182 and 16420 kHz are monitored by the USCG. Frequencies are monitored according to propagation; not all frequencies are monitored at all times. These radiotelephone channels use upper sideband (USB - 2K80J3E); the frequency shown is the suppressed carrier reference frequency. VHF channel 16 uses wideband FM (16K0F3E or 16K0G3E).

DSC	Voice
* 2187.5 kHz	* 2182 kHz
4207.5 kHz	4125 kHz
6312.0 kHz	6215 kHz
8414.5 kHz	8291 kHz
12577.0 kHz	12290 kHz
* 16804.5 kHz	* 16420 kHz
156.525 MHz (Channel 70)	156.800 MHz (channel 16)
* International distress channel that is not monitored by USCG	

HF Disaster Communications

		6888.1	N		

- Carrier frequencies in kHz.
- **D** = Daytime Operations Only, **N** = Night Operations Only, **E** = East of 108° West Longitude (WL), **M** = West of the Mississippi River, **W** = West of 90° WL.
- **May be licensed for repair of telecommunications circuits, power & pipeline distribution etc.** See FCC rules 90.266, 90.35(c)(1), and 90.129(o).
- Emissions: Only 2K80J3E (USB), 100HA1A, 100HA1B, and those emission types listed in §90.237(g) are permitted.

Standard Time and Frequency Broadcasts

Radio station WWV (Fort Collins, Colorado),WWVH (Kauai, Hawaii), and CHU (Ontario, Canada) broadcast continuous time signals on precise frequencies. Because the broadcasts occur simultaneously on several HF frequencies at high power, at least one of the signals should be receivable at all times throughout the US and Canada. This can be useful for testing HF receivers and antennas, and for selecting frequencies based on currently observable propagation.

Frequencies (MHz)		
WWV	WWVH	CHU
2.500	2.500	3.330
5.000	5.000	7.850
10.000	10.000	14.670
15.000	15.000	
20.000		
25.000		
Double Sideband AM	Double Sideband AM	Full Carrier USB
Male Voice	Female Voice	English and French

Standard Time by Telephone

1-303-499-7111 - WWV (Colorado) 1-808-335-4363 - WWVH (Hawaii)
1-202-762-1401 , 1-202-762-1069 (DSN 762-1401, 762-1069) - Washington, DC
1-719-567-6742 (DSN 560-6742) - Colorado Springs, CO
The Washington DC and Colorado Springs CO lines alternate between local (EST/EDT or MST/MDT) and UTC (Z) time.

Amateur Radio Emergency Frequencies

These frequencies (except 5167.5 kHz) are not available for licensing to Public Safety agencies. An Amateur Radio Operator License of the appropriate class is required in order to transmit on these frequencies.

Emergency Center of Activity Frequencies - emergency communications networks in North/Central/South America and the Caribbean are encouraged to establish their operations within 20 kHz +/- of these frequencies (kHz):

3750 or 3985 LSB		7060, 7240, or 7290 LSB
14300 USB	18160 USB	21360 USB

US Government stations and RACES stations may exchange emergency communications on any Amateur frequency. DHS (including FEMA) and USCG stations, among others, have frequency authorizations aligned with the five Amateur Service secondary channels at 5 MHz:

Carrier Frequency (kHz)	Center Frequency (kHz)
5330.5	5332.0
5346.5	5348.0
5357.0	5358.5
5371.5	5373.0
5403.5	5405.0

Alaska Emergency Frequency - 5167.5 kHz USB carrier frequency, 5168.9 kHz assigned (center) frequency – may be used in or within 50 nautical miles of Alaska for emergency communications, including exercises. Interoperability with Part 90 Private Land Mobile Radio Service stations is authorized.

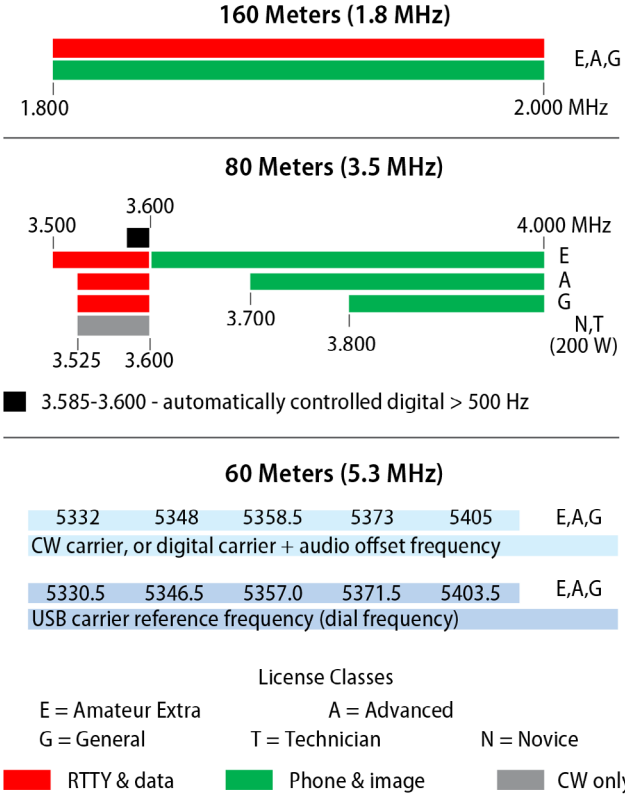
223.5	FM
432.1	USB
446.0	FM
927.5	FM
1294.5	FM

These are not Public Safety frequencies – an Amateur Radio Operator license is required to use them.

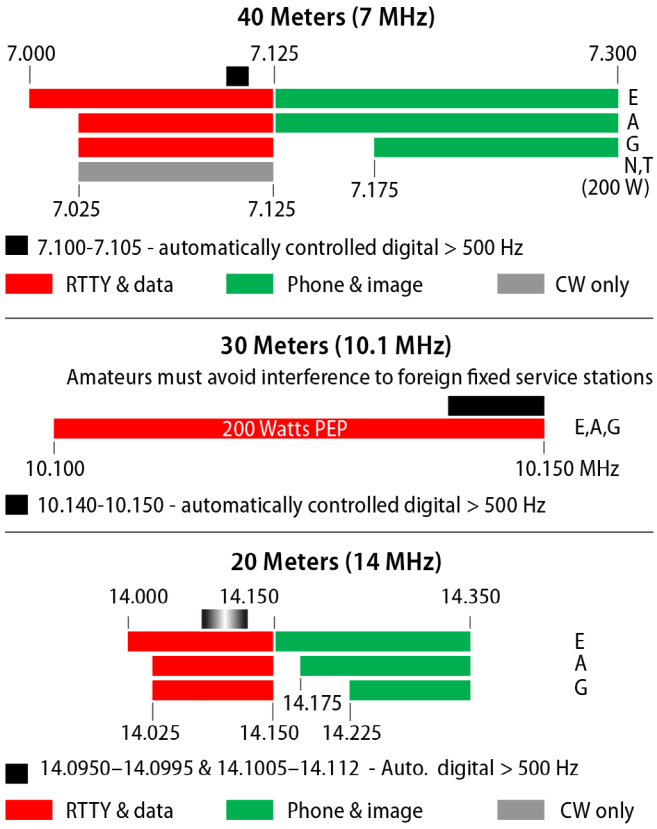
Amateur Radio Repeater Coordinators

http://nfcc.us/index.php/nfcc-coordinators

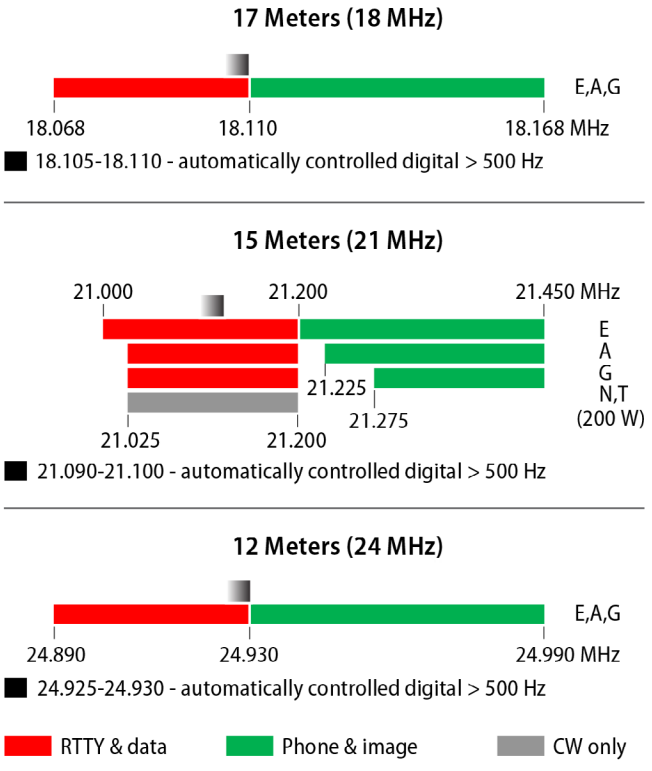
Amateur Radio Bands (US)



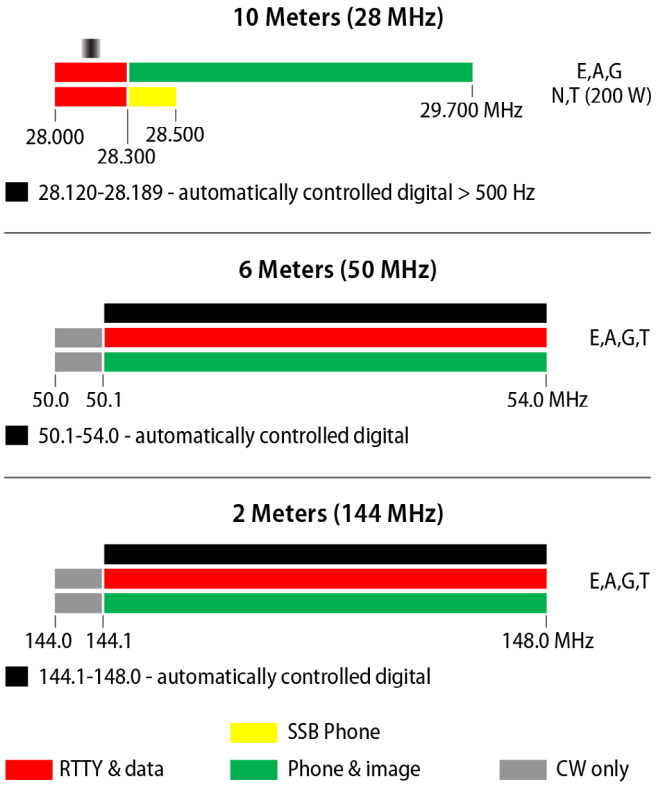
Amateur Radio Bands (US) – continued



Amateur Radio Bands (US) – continued

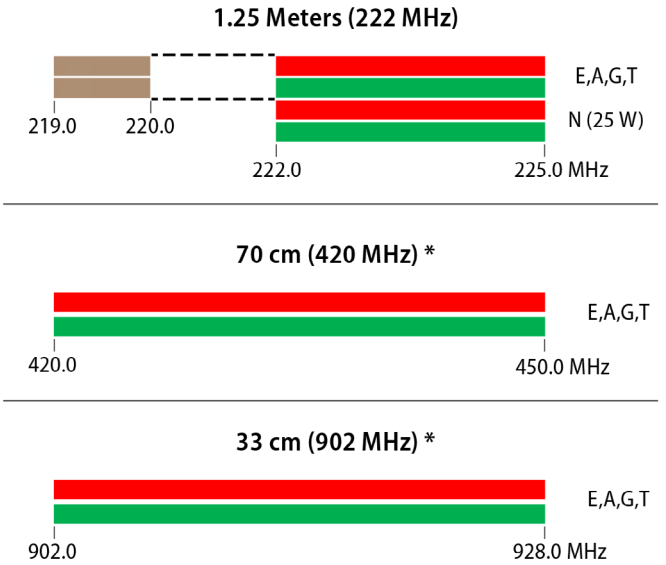


Amateur Radio Bands (US) – continued



Amateur Radio Bands (US) – continued

Automatically controlled digital stations may operate on all frequencies above 50.1 MHz; 500 Hz bandwidth limitation does not apply.



* Geographical and power restrictions may apply

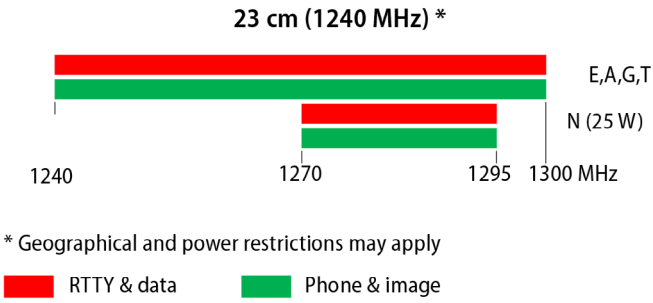
Fixed digital message forwarding systems only

RTTY & data

Phone & image

Amateur Radio Bands (US) – continued

Automatically controlled digital stations may operate on all frequencies above 50.1 MHz; 500 Hz bandwidth limitation does not apply.



In addition to the automatically controlled digital sub-bands shown in this chart, in which the emission may occupy a bandwidth greater than 500 Hz below 50 MHz, except for the Amateur secondary channels at 5 MHz a station may be automatically controlled while transmitting a RTTY or data emission on any other frequency authorized for such emission types provided that:

1) The station is responding to interrogation by a station under local or remote control; and

2) No transmission from the automatically controlled station occupies a bandwidth of more than 500 Hz.

(FCC rule 97.221)

Amateur Radio Bands (US) - continued

All licensees except Novice are authorized all modes on the following frequencies:	
2300-2310 MHz	47.0-47.2 GHz
2390-2450 MHz	76.0-81.0 GHz
3300-3500 MHz	122.25-123.0 GHz
5650-5925 MHz	134-141 GHz
10.0-10.5 GHz	241-250 GHz
24.0-24.25 GHz	All above 275 GHz

Amateur Radio Power Limits (US)

FCC Rule 97.313

(a) An amateur station must use the minimum transmitter power necessary to carry out the desired communications.

(b) No station may transmit with a transmitter power exceeding 1.5 kW PEP.

[60 meters: 100W PEP ERP; 30 meters: 200W PEP; additional restrictions apply under certain conditions, and to Novice and Technician licensees.]

EMERGENCY MEDICAL PROCEDURES

ICS 206 – Block 8 – "Dutch Creek Protocol"

In the event of a medical emergency provide the following information to the Communications Unit.

1. Declare the nature of the emergency.
    a. Medical injury/illness?
    b. If injury/illness, is it Life Threatening?
2. If Life Threatening, then request that the designated frequency be cleared for emergency traffic.
3. Identify the on-scene Point of Contact (POC) by Resource and Last name (i.e. POC is TFLD Smith).
4. Identify nature of incident, number injured, patient assessment(s) and location (geographic and GPS coordinates).
5. Identify on-scene medical personnel by position and name (i.e. EMT Jones).
6. Identify preferred method of patient transport.
7. Request any additional resources and/or equipment needed.
8. Document all information received and transmitted on the radio or phone.
9. Identify any changes in the on-scene Point of Contact or medical personnel as they occur.

To download or request copies of the NIFOG, please visit
