

ALERT Clay County

Emergency Management's Mass Notification System

EMERGENCY ALERT MESSAGE

Clay County through the Florida Division of Emergency Management is making available to its residents and business owners a new, high-speed emergency notification known as **Alert Clay County**. This system will replace the county's current CodeRED system, providing the same functionality at a lower cost, as **Alert Clay County** is part of a larger, statewide alert & notification system.

Alert Clay County provides county and municipal residents and business owners with the ability to receive emergency notifications and warnings regarding emergencies and/or threatening severe weather on their home phone, business phones, cell phones and email address. To ensure that the system will call you when your address or business is threatened by an emergency or by severe weather, simply register your address and contact information onto the **Alert Clay County** portal, located on the county website at ALERT.claycountygov.com. Please call 904-284-7703 for further questions about this.

Please note that Clay County will no longer be utilizing the CodeRED system and that any individuals who wish to have their emergency notification service carried over to Alert Clay County must register into the Alert Clay County web portal.
